... and group executive of Risdon Corp.'s Color Cosmetics Group, leading U.S. manufacturer of **lipstick cases**. It's the way the case feels in the palm of the hand. The way the lipstick swivels. The shape of the **case**. Its texture.

While **lipstick cases** have performed the same basic function since they were introduced in their modern form earlier...

...perhaps be credited with starting the recent trend, says the Risdon executive. "With its deeply **fluted** surface and column-like look, the package drew immediate raves," he reports.

A newer, equally...

...made by Risdon in a special bulging process, that forms a cleavage in which the **fluted top** rests. "The result is a very high class, striking package," Mr. Schofield adds.

While metal...

...particular attention is being paid to the lipstick "waistband," or the component that separates the **cap** from the base.

While in the past, a large number of these pieces had the appearance of a simple metal wedding band, now **lipstick case** designers are experimenting and finding success with a more sculptured collar look similar to that...

...As an example, Mr. Schofield Cites Lancome's "Hydra-Riche," whose jet black base and **cap** are accented by a two-tier plastic collar/waistband that is vacuum metalized and lacquered...

...waistband. An embossed metal plate in a matching gold color is then added to the **top** of the ivory **cap**, yielding a more prestigious effect.

Texturing is also used to give more value to plastics...

...comments, noting that Ultima's "Couture" lipstick has a bold geometric pattern molded into its **cap** and base for greater visual interest and a more upscale look. He cites the promotional...

...example. Echoing the look of the all-brass version, the plastic case also has a **fluted** texture. Other textures including bamboo, swirling lines and the irregular surface of slate are also said to be relatively easy to achieve.

A clear packaging idea can also make a **lipstick case** unique. Noxell, when looking for a way to set its new "Clarion" line apart from the dozens of other lipstick packages on store shelves, decided to use two different **caps** in a single package. The lipstick comes in a see-through plastic **cap** that enables the consumer to check the shade, but a more upscale, opaque **cap** to match the base is also included for use after purchase. The combination, Risdon believes...

...cases are one important way cosmetic marketers keep attracting consumers

to generation after generation of lipsticks ."

Risdon's Cosmetic Container Group, headquartered in Danbury, Conn., decorates and assembles lipstick cases made of metal, plastic or a combination of both, while the firm's Eyelet Specialty...

...sophisticated look and feel. Estee Lauder's all-brass Re-Nutriv case has a deeply **fluted** surface and column-like look. Elizabeth Arden's Luxury case, is also made almost entirely...

... made by Risdon in a special bulging process, that forms a cleavage in which the **fluted top** rests. Though more expensive to produce vs plastic cases, the metal cases have timelessness that...

... for smooth-action swivel mechanisms. Risdon has made progress in the area by redesigning the **lipstick case** 's elevator cup, resulting in better dimensional precision and stability that can provide the smooth...

... Attention is also being focused on the lipstick waistband, or the component that separates the **cap** from the base, to upgrade the container's appearance without greatly increasing costs. **Lipstick case** designers are opting for a more sculptured collar look similar to that found on fragrance packages. Value is also being added to **lipstick cases** made mostly of plastics by including a metal component or at least simulating the look of metal. Texturing is also used to give more value to plastic **lipstick cases**. Texturing can include bamboo, swirling lines and the irregular surface of the slate. Clear packaging can also make a **lipstick case** appear unique.

**Cosmetics container** excludes oxygen and moisture

The patent claims that the assembled container has a visually pleasing appearance as well as having a **closure** system ( **lid** plus seal) that excludes atmospheric oxygen and moisture.

The round plastic container comprises a receptacle...

...ring supported by a ledge. The ring surrounds the open end and supports a transparent **lid** which is itself thickened to cause magnification. The **lid** has a number of downward facing catch **projections** that secure it to the **ring**. These **projections** are hook-shaped and engage into corresponding elongated grooves in the ring.

Unilever plc (Arden...

...EP455421 and US patent US5064082. - Easy-to-open container avoids need for separate pull-off **top**. A method of manufacturing an easy-to-open container has been developed whereby the use of a separate pull-off **top** is avoided.

This is claimed to be an advantage because separate **tops** are difficult both to manufacture and for consumers to use correctly. The containers have two these are 'High speed vial packaging' WO9106475 and 'Child resistant **closure**, ' Canadian patent CA2003194. In March, 'Plastics vials for single dose syringe use' WO9108729, 'Reclosable backing...
